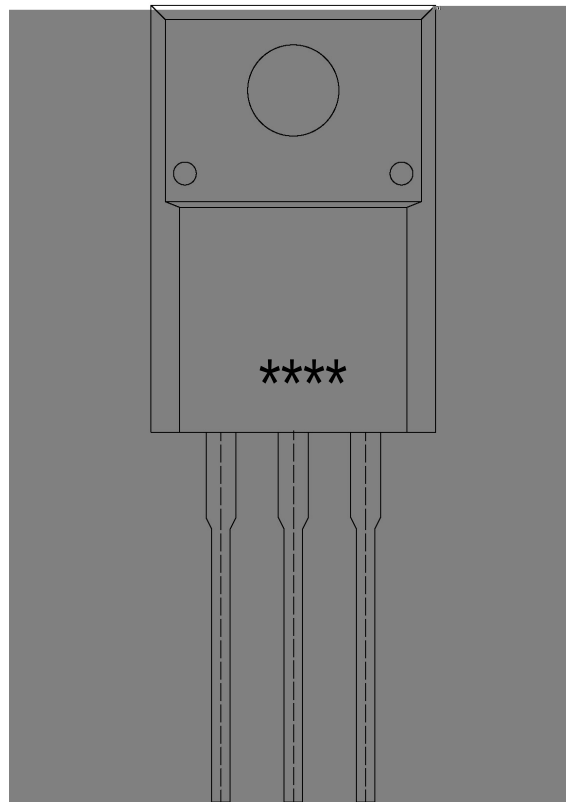

Figure 1 consists of two plots. The left plot shows the number of iterations required to reach a solution for different values of the number of iterations. The x-axis is labeled 'Number of iterations' and ranges from 0 to 100. The y-axis is labeled 'Number of iterations required to reach a solution' and ranges from 0 to 100. The plot shows a curve that starts at (0, 0) and increases to a peak of approximately 100 at 50 iterations, then decreases to approximately 50 at 100 iterations. The right plot shows the number of iterations required to reach a solution for different values of the number of iterations. The x-axis is labeled 'Number of iterations' and ranges from 0 to 100. The y-axis is labeled 'Number of iterations required to reach a solution' and ranges from 0 to 100. The plot shows a curve that starts at (0, 0) and increases to a peak of approximately 100 at 50 iterations, then decreases to approximately 50 at 100 iterations.
